

bk5000

Ultrasound

Case-by-Case
MOBILE SERVICE

The bk5000 is designed to deliver high resolution images quickly and efficiently.

Its small footprint allows positioning in many clinical settings. A short 20 second boot time ensures the system is ready when needed.

Advanced controls provide the best image quality across many applications such as Urology, Gynecology, Neurology, Colorectal, Robotic and General Surgery.

Outstanding color Doppler and spatial resolution

Dynamic color flow for visualization of high resistance blood flow patterns

Image enhancement provides a well-focused image from near to far field

**Advanced imaging modes such as:
Elastography, Contrast, Vector Flow and 3D**

Product Features & Specifications

bk5000 Ultrasound

Available Transducers

Robotic-Assisted
Applications: Intraoperative

4 Way Laparoscopic 9066
Applications: Intraoperative

T-Shaped Intraoperative 9016
Applications: Intraoperative,
Abdominal

Intraoperative Biplane 9024
Applications: Intraoperative,
MSK, PV

Craniotomy 9062
Applications: Intraoperative,
Neurosurgery, Neonatal,
Cephalic, Pediatric

Hockey Stick 9009
Applications: Intraoperative,
PV, Small Parts, MSK, Brain/
Spinal Cord

Endocavity Biplane 9048
Applications: Transrectal,
Transvaginal

Prostate Triplane 9018
Applications: Transrectal,
Transvaginal

Prostate Biplane 9008
Applications: Transrectal
